- ★ Game Ready Animator: Seamlessly integrate the slimes into your game with the provided animator, saving you time and effort.
- ★ Blend Tree 360 Degree Animations: Enjoy smooth and comprehensive animations with the asset's blend tree, providing seamless transitions and complete coverage across all angles.

Usage

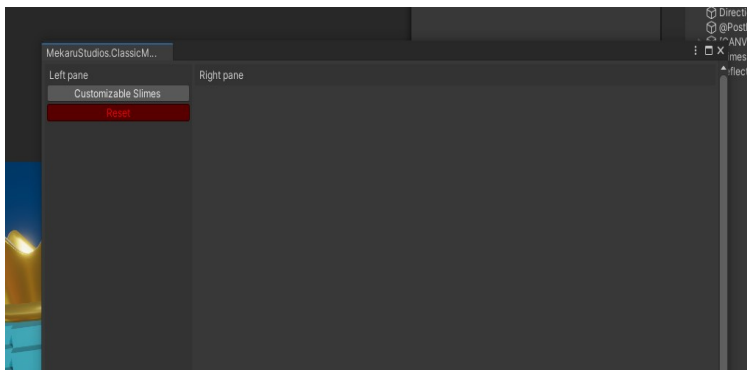

Monster Creator Tool

The "Slime Creator Tool" is a user-friendly asset that simplifies the process of creating and customizing slimes for game developers. With intuitive controls and a range of customization options, you can easily design unique slimes to fit your game's needs. The tool allows for instant integration, so you can quickly use your customized slimes in your game without delay. Save time and effortlessly bring your slime characters to life with the efficient and versatile "Slime Creator Tool."

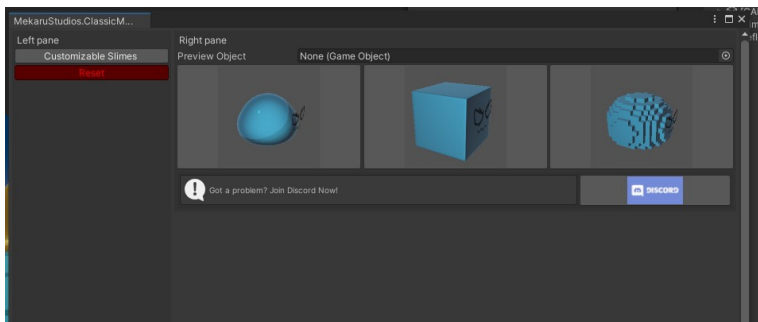

1) Open Slime Creator Tool: Tools>Mekaru Studios>Monster Creator

2) Mekaru Studios packets that compatible with monster creator, will be visible in the left pane.

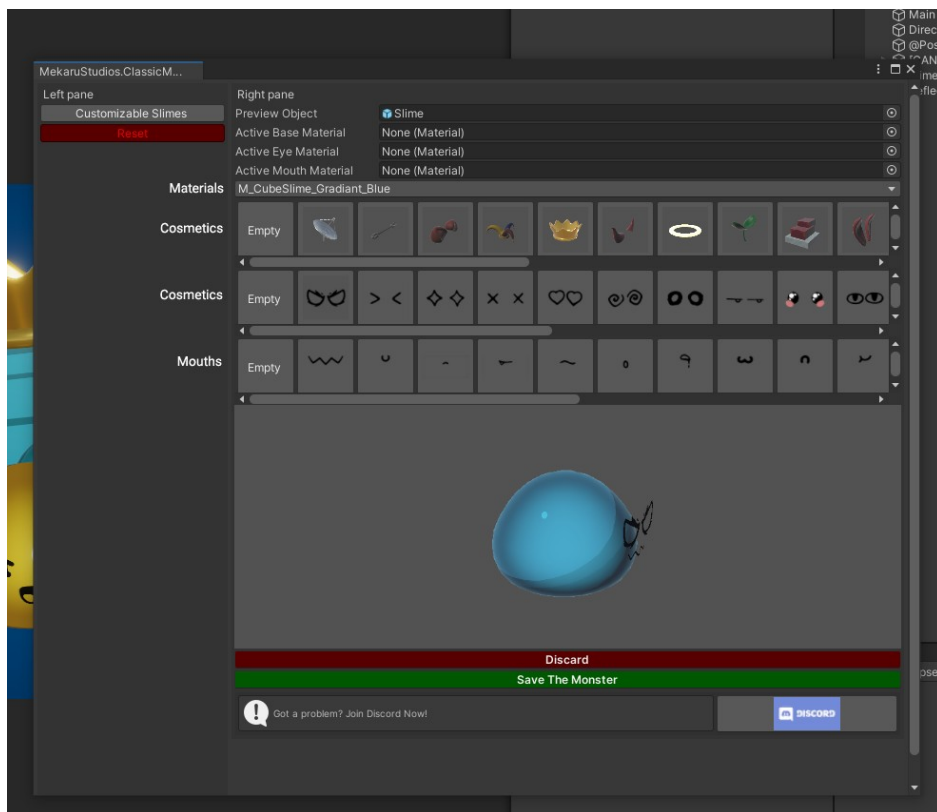

3) Choose the monster type that aligns with your specific requirements.

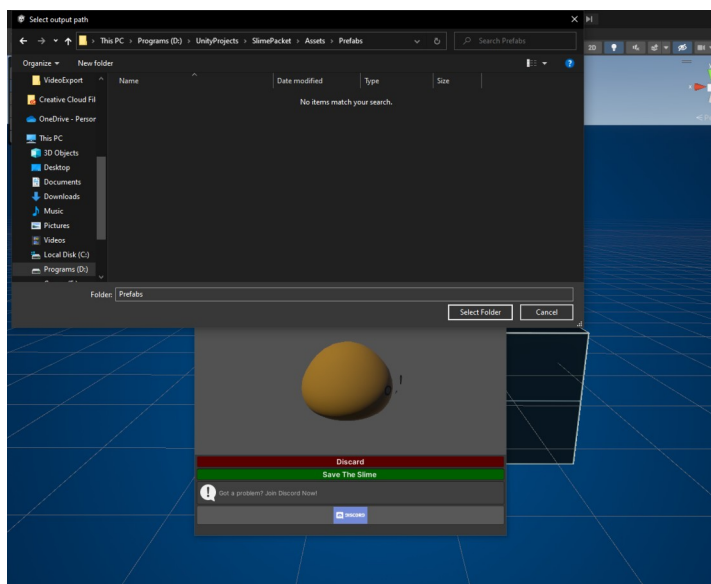

4) If there are some missing texture, or if you added any new content to tool, press “Reset” button to reload all new data.
(Optional)

5) Customize your slime as you wish.

6) Press “Save” button and select a destination path for saving the prefab variant.

Adding New Cosmetics, Materials and Slime Types

To incorporate new cosmetics, it's just enough to add your cosmetic inside a folder called Resources>Cosmetics>[Type]. This folder path can be structured at any folder in your "Assets" folder. However for use of ease, you need to put your cosmetic in a folder that represent a cosmetic type name, which defined in XML file. Example: Resources>Cosmetics>Hats

Here are some cosmetic type names as default:

- Hats
- Wings
- Body

Also you can modify or add new cosmetic type names with modifying the XML file that comes with your monster packet.

For slime packet, this XML file located at:

MekaruStudios>SlimePack>MonsterCreatorTool>MekaruStudiosMonsterCreator.xml
